

help("efa_summary")

Linearity

Reference line should be flat and horizontal

Residuals

Homogeneity of Variance

Reference line should be flat and horizontal

$\sqrt{|\text{Std. residuals}|}$

help("model_summary")

Collinearity

Higher bars (>5) indicate potential collinearity is

Influential Observations

Points should be inside the contour lines

Normality of Residuals

Dots should fall along the line

Sample - Normal Distribution Quantiles Variance Inflation Factor (VIF)

Normality of Residuals

Distribution should be close to the normal curve

Omega
