[help\("plot.see_bayesfactor_models"\)](#)

Labels are log(BF).

help("plot.see_bayesfactor_models")

Collinearity

High collinearity (VIF) may inflate parameter uncertainty

Homogeneity of Variance
Reference line should be flat and horizontal

help("plot.see_check_heteroscedasticity")

Homogeneity of Variance (Bartlett Test)

Groups should be evenly spread

Normality of Residuals
Distribution should be close to the normal curve

Influential Observations
Points should be inside the contour lines
