

Posterior Predictive Check

Model-predicted lines should resemble observed data line

Linearity

Reference line should be flat and horizontal

Homogeneity of Variance

Reference line should be flat and horizontal

Influential Observations

Points should be inside the contour lines

Collinearity

High collinearity (VIF) may inflate parameter uncertainty

Normality of Residuals

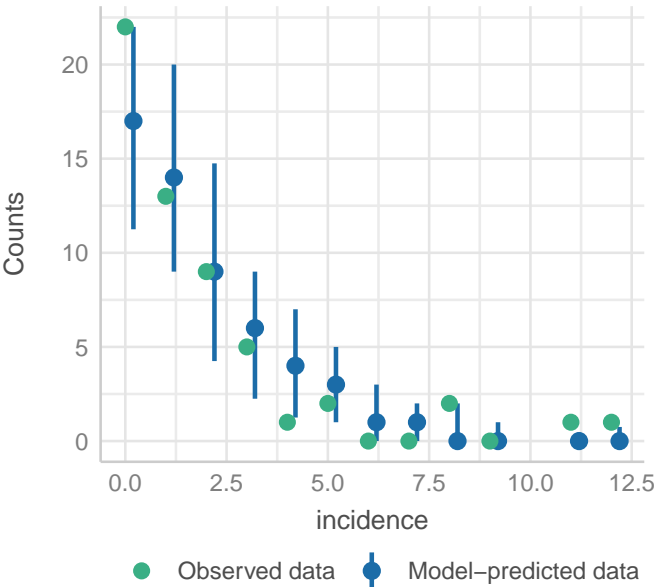

Points should fall along the line

Posterior Predictive Check

Model-predicted intervals should include observed data

Misspecified dispersion and zero-inflation

Observed residual variance (green) should follow predicted

Homogeneity of Variance

Reference line should be flat and horizontal

Influential Observations

Points should be inside the contour lines

Posterior Predictive Check

Model-predicted lines should resemble observed data

Linearity

Reference line should be flat and horizontal

Homogeneity of Variance

Reference line should be flat and horizontal

Influential Observations

Points should be inside the contour lines

Collinearity

High collinearity (VIF) may inflate parameter uncertainty

Normality of Residuals

Dots should fall along the line

Normality of Random Effects (class)

Dots should be plotted along the line

Posterior Predictive Check

Model-predicted lines should resemble observed data line

Linearity

Reference line should be flat and horizontal

Homogeneity of Variance

Reference line should be flat and horizontal

Influential Observations

Points should be inside the contour lines

Collinearity

High collinearity (VIF) may inflate parameter uncertainty

Normality of Residuals

Points should fall along the line

Posterior Predictive Check

Model-predicted lines should resemble observed data line

Linearity

Reference line should be flat and horizontal

Homogeneity of Variance

Reference line should be flat and horizontal

Influential Observations

Points should be inside the contour lines

Normality of Residuals

Points should fall along the line

Posterior Predictive Check

Model-predicted lines should resemble observed data

Linearity

Reference line should be flat and horizontal

Homogeneity of Variance

Reference line should be flat and horizontal

Influential Observations

Points should be inside the contour lines

Collinearity

High collinearity (VIF) may inflate parameter uncertainty

Normality of Residuals

Dots should fall along the line

Normality of Random Effects (class)

Dots should be plotted along the line

Posterior Predictive Check
